Author Index Volume 110 (1999)

Babovsky, H., Kinetic boundary layers: on the adequate discretization of the Boltzmann collision operator 225–239
Bai, Z.-Z., D.J. Evans and **R.C. Calinescu,** A class of asynchronous multisplitting two-stage iterations for large sparse block systems of weakly nonlinear equations 271–286

Cabada, A. and **S. Lois,** Existence of solution for discontinuous third order boundary value problems 105–114
Calinescu, R.C., see **Bai, Z.-Z.** 271–286
Chang, C.-S., see **Li, Z.-C.** 241–270

de Lis, J.S., see **García-Melián, J.** 73– 91
Diele, F. and **I. Sgura,** Isospectral flows and the inverse eigenvalue problem for Toeplitz matrices 25– 43
Dorfmann, A.A., Water waves diffraction by a circular plate 287–304

Elster, C., Recovering wavefronts from difference measurements in lateral shearing interferometry 177–180
Evans, D.J., see **Bai, Z.-Z.** 271–286

Frommer, A. and **R.A. Renaut,** A unified approach to parallel space decomposition methods 205–223
Funaro, D. and **G. Pontrelli,** Spline approximation of advection–diffusion problems using upwind type collocation nodes 141–153

García-Melián, J., J.S. de Lis and **M. Sanabria-García,** Eigenvalue analysis for the p-Laplacian under convective perturbation 73– 91

Li, Z.-C. and **C.-S. Chang,** Boundary penalty finite element methods for blending surfaces, III. Superconvergence and stability and examples 241–270
Li, Z.-C., Boundary penalty finite element methods for blending surfaces — II: Biharmonic equations 155–176
Linß, T., An upwind difference scheme on a novel Shishkin-type mesh for a linear convection–diffusion problem 93–104
Liu, Y., Numerical solution of the heat equation with nonlocal boundary conditions 115–127
Lois, S., see **Cabada, A.** 105–114

McNamee, J.M., An updated supplementary bibliography on roots of polynomials 305–306
Melnik, K.N. and **R.V.N. Melnik,** Optimal-by-order quadrature formulae for fast oscillatory functions with inaccurately given a priori information 45– 72
Melnik, R.V.N., see **Melnik, K.N.** 45– 72
Mickens, R.E., Discretizations of nonlinear differential equations using explicit nonstandard methods 181–185

Pontrelli, G., see **Funaro, D.** 141–153

Qiao, H., see **Ren, Y.** 15– 24

Ramage, A., A multigrid preconditioner for stabilised discretisations of advection–diffusion problems 187–203
Ren, Y. and **A. Spence,** A note on bifurcation points for index-1 differential-algebraic problems 1– 14
Ren, Y., B. Zhang and **H. Qiao,** A simple Taylor-series expansion method for a class of second kind integral equations 15– 24
Renaut, R.A., see **Frommer, A.** 205–223

Sanabria-García, M., see **García-Melián, J.** 73– 91
Sgura, I., see **Diele, F.** 25– 43
Spence, A., see **Ren, Y.** 1– 14

Tan, J.-Q., see **Zhu, G.-Q.** 129–140

Zhang, B., see **Ren, Y.** 15– 24
Zhu, G.-Q. and **J.-Q. Tan,** A note on matrix-valued rational interpolants 129–140
